Bright Futures Clarkston High School

Fall Semester 2018

To learn more, contact Whitney Conner at 678-852-8560 or wconner@lsga.org. You can also check the 2018-2019 calendar for upcoming events and field trips!

ENCOURAGING LEARNING. EMPOWERING BRIGHT FUTURES.

IN THIS ISSUE 12/19/2018

Students participated in fun and educational activities! The program at Clarkston High School focuses on STEM lessons that give students experience in engineering, science, math and design. Our program at Clarkston High School also offers recreation, guest speakers, and time to work on reading!

Parent Events

Parents have been invited to a number of activities! Parents had the opportunity to accompany students to Parent/Teacher conferences and the truancy prevention meeting on October 25, 2018. Parents and teachers were also invited to our CHS Friendsgiving, where families and students celebrated things they are thankful for! Parents were invited to attend the LSG LIHEAP event, where families received assistance for winter utility bills. We look forward to more parent engagement in the spring semester!

Conflict Resolution

On Monday afternoons, our class meets with Paul, a local community member. Paul speaks with us about healthy conflict and how to resolve conflicts between our peers. We also learn about how to communicate well, and enjoy interactive activities with our friends!

Refugee Youth Career Pathways

In fall 2018, we started a new opportunity within our program: Refugee Youth Career Pathways! Students had the opportunity to participate in RYCP to learn about job fields, resume and interviewing skills, receive job and internship placements, as well as, apply for our RYCP scholarship! This program will continue into the Spring 2019 semester.

Field Trips

The Bright Futures Program has gone on a number of field trips, including a visit to the Civil and International Human Rights Center and Johnny Rockets in Atlanta, GA. The group also went on a fun hiking trip to Sweetwater Creek State Park and to an Atlanta Braves baseball game. In the upcoming semester, students will have the opportunity to participate in college visits to North Georgia College, The University of Georgia, Georgia Tech, and Georgia State University.
